MOORING STAR

MOORING STAR

This quality Swedish mooring compensator is made from the highest grade steel and coated with an attractive, ultra durable and resistant abcite finish.

MooringStar exceeds all marine industry criteria for rust resistancy, UV protection and strength.

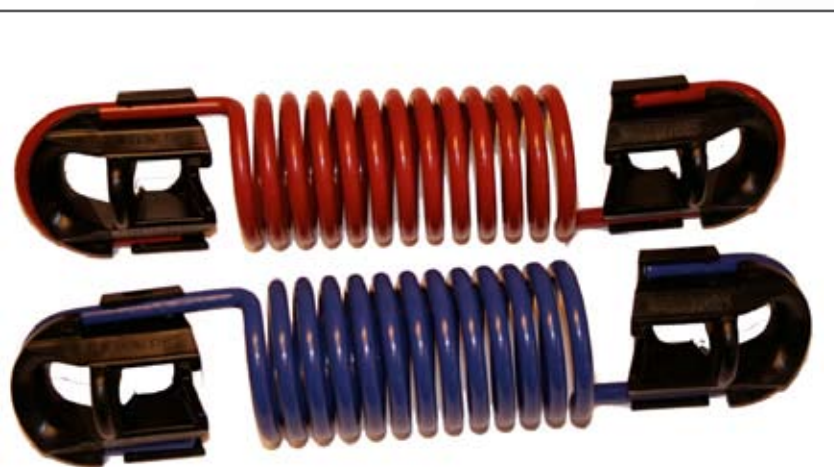

MooringStar is fastened without the need for shackles or safety cables as well as being elegant and easy to use.

MooringStar's unique design minimises rope and dock damage as well as ensuring quiet mooring.

No contact between the spring mechanism and the rope means quiet mooring and more resistance to rust and corrosion.

No need for shackles or safety cables.

Mooringstar is available in two different sizes suitable for 14-16 mm and 18-20 mm lines, and a variety of colours.

The durable steel spring and ADCITE shell coating ensure maximum protection against rust and UV damage exceeding the highest testing criteria in the marine industry. (C5M standard)

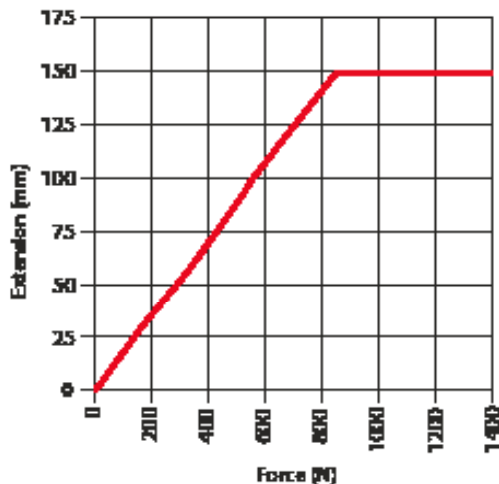

MooringStar is suitable for both 3-strand line and braided mooring lines.

Extension Test

Mooring diagram shows spring extension in relation to exerted force.
